

Sporting fun – Everyone can boulder

Initially boulder walls used to be part of the training equipment needed to get ready for extensive climbing tours. In the meantime, however, they have been established as adequate sports and playground elements. For a good reason: for climbing you do not need to have any previous knowledge, nor belay devices or any other specific equipment. Nevertheless, ambitious sportsmen and beginners alike will find ever new routes. Leisure sports in its purest form: up and to the side, then diagonally ...

The holds can be arranged so that they are suitable for the tall and the small, but climbing still remains diversified. What if the next hold will not work out alright? Never mind! Simply jump off from a low height and start your next attempt. From a safety point of view this is absolutely ideal for playgrounds and schools.

CONCRETE[®]

WALLS

| RUDOLPH

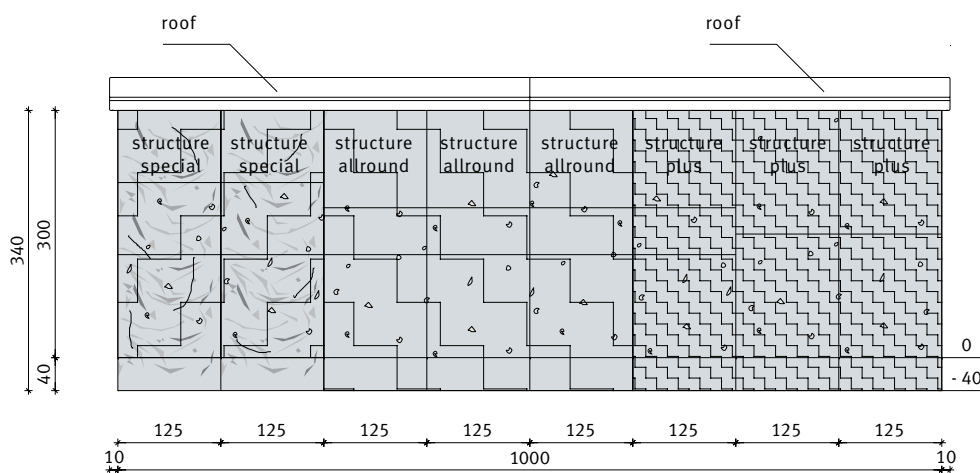

Modular boulder wall »Neuss« with weather protection

The amount of holds is considerably higher than for rope climbing facilities – i.e. many different routes in close proximity. Concrete® boulder walls can be executed either as stand-alone or as filled-up supporting walls. A roofing of concrete is added as weather protection. Durable climbing fun for the tall ones and the small ones.

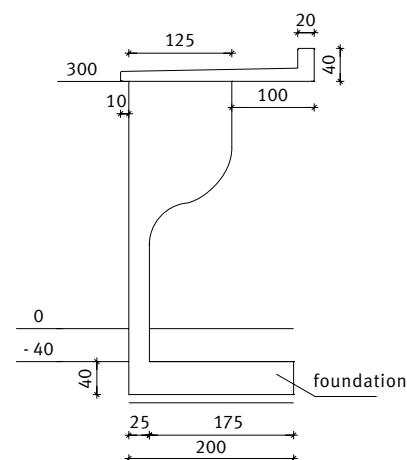

ITEM NO.	LENGTH	WIDTH	HEIGHT	WEIGHT
BWN01	235 cm	1000 cm	340 cm	Weight per element (w = 125 cm) 2 x 4 t, 4 x 6 t, 2 x 4 t, roof 2 x 5 t

CREFIX® coating and holds on all sides. Element of high-class C 30/37 concrete, solid. Foundation to be provided by customer.
